Product Description

Modern Ag 32" Compact Path Slayer

Modern Ag Products Compact Path Slayer is an extremely well-built, versatile, hydraulic direct drive brush cutter designed to take care of difficult mowing chores. The Compact Path Slayer is a front-end loader-mounted brush cutter designed to tackle jobs such as vertical road and hunting lane cutting. It is ideal for maintaining trails, slopes, lakes, retaining ponds, ditches, and plantation rows.

The Compact Path Slayer is made for compact tractor lines and is not to be used on skid steers. Modern Ag Products make it, so you know it is built to last.

For greater flexibility, this unit can be combined with our HR30 (005-0030) for a completely closed hydraulic loop.

Covered by a 1-year residential manufacturing defect warranty
