Product Description

Stihl MS251 Wood Boss Chainsaw 18"

The MS 251 WOOD BOSS® chainsaw is designed to deliver all the power you'd expect from STIHL equipment with a comfortable and ergonomic design. The MS 251 WOOD BOSS® is perfect for felling small trees, pruning and thinning, and cutting firewood simply and efficiently. With up to a 20 percent increase in fuel savings and a 50 percent reduction in exhaust emissions—when compared to previous models—you can enjoy a longer run time while feeling good about your impact on the environment. Features like a Master Control Lever™ and reduced vibration make the MS 251 WOOD BOSS® a lean, easy-to-use machine that still packs plenty of power.

- **IntelliCarb™ Compensating Carburetor -**

The IntelliCarb™ Compensating Carburetor is designed to automatically adjust the air/fuel ratio when the air filter becomes restricted or partially clogged and maintains the engine's correct RPM.

IntelliCarb™ uses air from the clean side of the air filter to control the diaphragm and flow of fuel. As the air filter becomes dirty and less air is available for the carburetor, the IntelliCarb™ system adjusts the fuel flow to compensate for the decrease in air flow. This is in contrast to typical carburetors that utilize this air from the "dirty" side of the air box.

- **Bumper Spikes -**

These spikes prevent pull-in and provide better control, making cutting easier.

- **Toolless Fuel and Oil Caps with Retainers -**

Simply lift the lever and twist the caps to remove or tighten. There's no need to use a tool to tighten or loosen.

- **Anti-Vibration System -**

STIHL has developed a system for minimizing the vibration levels of handheld outdoor power

equipment. The STIHL anti-vibration system helps reduce operator fatigue and provides a more comfortable working experience.

- **Master Control Lever™ -**

The Master Control Lever™ is an easy to use single lever, operating the choke, starting throttle lock, and on-off switch. The operator must pull the throttle trigger before moving the Master Control Lever™ to the choke position.

- **Throttle Trigger Lockout -**

This safety feature must be depressed before the trigger can be activated.

- **High-Tech Polymer Housings -**

Housings are lightweight, withstand greater impact, and are corrosion-resistant.

- **Made in America -**

A majority of STIHL products sold in America are made in America of U.S. and global materials.
