Product Description

Stihl MSA161T Battery-Powered Chainsaw 12"

A member of the AP Battery Series, the MSA 161 T is ideal for professional arborists looking for lightweight, quiet performance for in-tree work. Equipped with a commercial-grade, brushless electric motor, this zero exhaust emissions top-handle chainsaw delivers ideal speed, cutting capacity and run times. This chainsaw also features instant-start technology and is easy to use and maneuver, reducing user fatigue, so you can keep going until the job is done. The MSA 161 T is also equipped with a 1/4" STIHL PICCO™ saw chain for precise cutting performance and providing clean, smooth cuts, making it ideal for pruning and in-tree maintenance. Experience the benefits of a battery-powered, high-performance chainsaw with the MSA 161 T. Test the MSA 161 T for yourself at our Dealership today.

- **Ematic™ Lubrication System -**

The Ematic™ guide bar, when used with STIHL OILOMATIC® saw chain, will provide proper lubrication and less oil consumption than conventional methods. The system works because two ramps, strategically placed in the guide bar rail, help contain the flow of oil and direct all lubrication to the sliding faces of the bar and chain links as well as the rivets and driver holes, which in turn can reduce bar oil consumption up to 50%.

- **STIHL Electric Motor -**

Lightweight and compact, STIHL electric motors require minimal maintenance and feature low noise levels and reduced vibration.

- **Lightweight Portability -**

This product is lightweight for easy portability, great maneuverability, and extended use.

- **Toolless and Translucent Bar and Chain Oil Tank -**

The translucent bar and chain oil tank makes it easy for users to check oil levels at a glance.

- **Side-Access Chain Tensioner -**

The side-access chain tensioner makes it much more convenient for the user to adjust the saw chain with a bar wrench as opposed to the typical location of the guide bar adjustment screw.

- **Throttle Trigger Interlock -**

This safety feature must be depressed before the trigger can be activated.

- **STIHL Quickstop® -**

STIHL chainsaws are equipped with a chain stopping system designed to reduce the risk of injury in certain kickback situations. It is called a STIHL Quickstop® chain brake. The STIHL Quickstop® chain brake is designed to stop the rotation of the chain if activated by the operator's hand or by inertia if the saw kicks back with sufficient force. In some working positions, the STIHL Quickstop® chain brake can be activated by inertia, stopping the chain within fractions of a second.
