Product Description

Stihl BGA100 Battery-Powered Blower

The Lithium-Ion battery-powered BGA 100 is built with the professional landscaper in mind. When in boost mode, the BGA 100 is the most powerful dedicated handheld blower in the STIHL range. The new BGA 100 design shifts the battery weight from the unit to the back or hip with a high-performance cable connecting system. This results in a lighter blower and reduces user fatigue. The BGA 100 features four performance levels through a variable speed throttle trigger delivering an even balance of blowing power and run time. Its rear-mounted air intake allows the blower to be used right- or left-handed. The quietest and lightest blower in the STIHL lineup, the BGA 100 allows you to clean up with ease around neighborhoods, urban areas, or other noise-sensitive zones.

Note: Must be used with battery belt or AR-style backpack battery. Required adapters purchased separately. Run time may vary based on battery type, charge level and capacity, model, operating style and conditions. Batteries and chargers can be purchased separately or as a combined set with tool.

- **IPX4 Rating -**

This tool is IPX4-rated for weather-resistant construction and has been designed and tested for splash-water protection.

- **Quiet Operation -**

This product is ideal for noise-sensitive areas.

- **Lightweight Portability -**

This product is lightweight for easy portability, great maneuverability, and extended use.

- **STIHL Electric Motor -**

Lightweight and compact, STIHL electric motors require minimal maintenance and feature low noise levels and reduced vibration.

- **Retaining Latch -**

When inserting battery, the first click will keep it inactive while secured in the compartment for transport mode and the second click will engage for tool operation

- **Hanging Slot -**

The built-in hanging slot allows for easy storage when not in use.

- **Soft-Grip Handle -**

This handle design provides a secure and comfortable grip.

- **Compact, Ergonomic Design -**

The compact, ergonomic design helps reduce user fatigue.

- **Multi-Function Handle -**

With the multi-function handle, all of the blower's controls can be adjusted with one hand, allowing simple and reliable operation for both right and left-handed users.
