Product Description

LS Tractor Rake Grapple MCG6001 - 60"

Step up your productivity with the LS Tractor MCG6001 60" Grapple—built for larger compact and utility tractors that demand more capacity without sacrificing control. Constructed from high-strength AR400 steel, this grapple is designed to take on heavy-duty jobs like land clearing, log handling, and storm cleanup with ease.

With a full 60" rake width and 62" overall width, the MCG6001 covers more ground in fewer passes, making it ideal for bigger properties and tougher workloads. The aggressive tooth design—7 bottom teeth and 6 top teeth—provides a strong, dependable grip on uneven materials, while the open frame design allows dirt and debris to fall through, increasing efficiency on every load.

Equipped with dual hydraulic cylinders, this grapple delivers powerful, even clamping force across a wide 30" jaw opening—perfect for grabbing bulky brush, limbs, and logs. Despite its size, it maintains a manageable weight of just 251 lbs, making it a great match for LS MT2 and MT3 series tractors.

The universal skid steer quick attach system ensures fast hookup and compatibility with a wide range of loaders, so you can get to work quickly.

Key Features:

- **Heavy-duty AR400 steel construction** for superior durability
- **60" rake width / 62" overall width** for increased productivity
- **Dual hydraulic cylinders** for strong, even clamping power
- **30" jaw opening** for handling large, bulky material
- **7 bottom & 6 top teeth** for maximum grip and control
- **Open design** allows debris to fall through for cleaner operation
- **Universal skid steer quick attach** for quick, easy connection
- **Optimized weight (251 lbs)** for larger compact tractors

Specifications:

- Attach Type: Skid steer quick attach
- Material: AR400 steel
- Weight: 251 lbs
- Overall Width: 62"
- Rake Width: 60"
- Closed Height: 28"

- Jaw Opening: 30"
- Side Width: 19 3/5"
- Tooth Thickness: 0.24"
- Hydraulic Cylinder: 2" x 1-1/5" rod (4-3/4" stroke)

Compatible With:

- LS MT2 Series
- LS MT3 Series

The LS MCG6001 is built for operators who need more reach, more grip, and more productivity—making it the perfect tool for tackling bigger jobs with confidence.
