Product Description

DHE Atlas 400 Series Disc Harrow 16x18 BB

Compact Size, Strong Performance

The **DHE Atlas 400 Series Disc Harrow (16x18 BB)** is a reliable, heavy-duty tool designed to handle tough soil conditions while delivering smooth, consistent results. Perfect for food plots, gardens, and small acreage, this disc harrow helps you break up ground, incorporate residue, and prepare an ideal seedbed with ease.

Built with a rugged steel frame, the Atlas 400 Series is made to stand up to repeated use without bending or flexing. The 16 notched 18" blades are designed to cut through packed soil and vegetation, providing excellent penetration and soil mixing for efficient ground preparation.

Featuring a ball bearing (BB) gang system, this unit offers smooth operation with reduced maintenance, making it a dependable choice for long-term use. Adjustable gang angles allow you to control the aggressiveness of the cut, giving you flexibility for both initial ground breaking and finishing passes.

With its slightly more compact size, the 16x18 configuration is a great match for compact tractors, offering excellent maneuverability while still delivering strong performance.

Key Features:

- Heavy-duty steel construction for durability and long life
- 16 notched 18" blades for effective soil cutting and mixing
- Ball bearing gang system (BB) for smooth, low-maintenance operation
- Adjustable gang angles for customized performance
- Ideal for food plots, gardens, and light field work
- Great for breaking ground and seedbed preparation
- Compatible with compact and utility tractors

For a dependable disc harrow that's easy to handle but tough enough for real work, the **DHE Atlas 400 Series 16x18 BB** is ready to go to work.
