Product Description

DHE Atlas 400 Series Disc Harrow 20x18 BB

Built for Tough Ground and Smooth Results

The **DHE Atlas 400 Series Disc Harrow (20x18 BB)** is designed for serious soil preparation, giving you the strength and performance needed to break up ground and create the perfect seedbed. Whether you're working food plots, gardens, or larger fields, this disc harrow delivers consistent, reliable results.

Built with a heavy-duty steel frame, the Atlas 400 Series is made to handle tough soil conditions without twisting or flexing. The 20 notched 18" blades are designed to aggressively cut through packed soil, residue, and vegetation, allowing you to break ground and incorporate material efficiently.

Equipped with a ball bearing (BB) gang system, this unit offers smooth operation and long-lasting durability with reduced maintenance. The adjustable gang angles allow you to fine-tune the level of cut and soil movement, giving you control for both aggressive tilling and lighter finishing work.

Ideal for compact and utility tractors, this disc harrow is a great choice for landowners and farmers looking to improve soil conditions and prepare planting areas with ease.

Key Features:

- Heavy-duty steel frame for long-lasting durability
- 20 notched 18" blades for aggressive soil cutting
- Ball bearing gang system (BB) for smooth, low-maintenance operation
- Adjustable gang angles for customized tilling performance
- Ideal for breaking ground, mixing soil, and seedbed preparation
- Great for food plots, gardens, and small fields
- Compatible with compact and utility tractors

For dependable performance and effective soil preparation, the **DHE Atlas 400 Series Disc Harrow 20x18 BB** is built to get the job done right.
