Product Description

DHE Atlas 1 Row Hiller

DHE Atlas 1-Row Hiller - Precision Row Building Made Easy

The **DHE Atlas 1-Row Hiller** is the perfect tool for shaping, maintaining, and rebuilding crop rows with speed and consistency. Whether you're working a garden, food plot, or small farm, this attachment helps you create clean, well-defined rows that promote better drainage, root growth, and overall crop performance.

Built with a durable, heavy-duty steel frame, the Atlas series is designed to handle repeated use in tough soil conditions without bending or flexing. The adjustable disc blades allow you to control row height and width, giving you the flexibility to match different crops and soil types.

This 1-row hiller is ideal for cultivating between rows, throwing soil up around plants like potatoes, corn, and vegetables, and maintaining rows throughout the growing season. Its compact design makes it easy to maneuver in tighter spaces while still delivering efficient, professional results.

With a standard 3-point hitch, hookup is quick and simple—so you can spend more time working and less time setting up.

Key Features:

- Heavy-duty steel construction for long-lasting durability
- Adjustable disc blades for customizable row height and width
- Ideal for building and maintaining crop rows
- Great for potatoes, vegetables, and small farm applications
- Compact design for easy maneuverability
- Helps improve drainage and crop growth
- Standard 3-point hitch for quick and easy attachment

For clean rows and consistent results, the **DHE Atlas 1-Row Hiller** is a dependable addition to your planting and cultivation setup.
