Product Description

DHE Atlas Heavy Duty Box Blade 4'

DHE Atlas Heavy Duty 4' Box Blade - Small Size, Heavy-Duty Performance

The **DHE Atlas Heavy Duty 4' Box Blade** is built for operators who need serious durability in a compact, easy-to-handle size. Perfect for sub-compact and small compact tractors, this box blade is ideal for grading driveways, leveling ground, and tackling light construction or landscaping projects with precision.

Don't let the 4-foot width fool you—this unit is constructed with a reinforced, heavy-duty steel frame designed to withstand tough working conditions. Whether you're working gravel, dirt, or packed soil, the Atlas series delivers consistent, reliable performance without bending or flexing under pressure.

Equipped with adjustable scarifier shanks, this box blade makes it easy to break up hard ground before smoothing it out. Dual cutting edges on the front and rear allow for efficient material movement and backfilling, while reversible edges help extend the life of the blade and keep it working like new.

The compact size makes it perfect for tighter areas and smaller properties, while still giving you the strength needed to get the job done right.

Key Features:

- Heavy-duty steel construction for long-lasting durability
- 4' working width - ideal for sub-compact and compact tractors
- Adjustable scarifiers for breaking up hard-packed soil
- Dual cutting edges for efficient grading and leveling
- Reversible wear edges for extended blade life
- Perfect for driveway maintenance, landscaping, and property upkeep
- Standard 3-point hitch for quick and easy hookup

If you need a compact box blade that's built tougher than the rest, the **DHE Atlas Heavy Duty 4' Box Blade** is ready to go to work.
