Product Description

DHE Atlas Heavy Duty Box Blade 5'

DHE Atlas Heavy Duty 5' Box Blade - Compact Size, Serious Strength

Don't let the size fool you—the **DHE Atlas Heavy Duty 5' Box Blade** is built to deliver big performance in a compact package. Perfect for smaller tractors, this box blade is ideal for maintaining driveways, leveling land, backfilling, and spreading material with precision and control.

Constructed with a reinforced, heavy-duty steel frame, the Atlas series is designed to handle tough conditions without twisting or flexing. Whether you're working gravel, dirt, or packed soil, this box blade holds up to demanding jobs while delivering smooth, even results.

The adjustable scarifier shanks make breaking up hard ground quick and easy, allowing you to loosen material before grading. Dual cutting edges—front and rear—give you maximum efficiency when moving and leveling material, while the reversible edges help extend the life of the blade.

With its 5-foot working width, this unit is a great match for compact tractors, offering excellent maneuverability without sacrificing performance.

Key Features:

- Heavy-duty construction for long-term durability
- 5' working width - ideal for compact tractors
- Adjustable scarifiers to break up hard-packed ground
- Dual cutting edges for efficient grading and backfilling
- Reversible wear edges for longer service life
- Perfect for driveway maintenance, leveling, and light construction work
- Standard 3-point hitch for quick and easy hookup

If you need a tough, reliable box blade that's sized right for your tractor but built like a bigger unit, the **DHE Atlas Heavy Duty 5' Box Blade** is ready to go to work.
