Product Description

Wilmington Jr Gas Grill - 304 SS

A smaller version of the Classic, the Junior comes standard with 10" heavy-duty rubber wheels, two large side shelves and features our seven-sided cooking chamber design with a single, cast 304 stainless steel burners. The Junior incorporates our indirect cooking design, which eliminates flare ups, allowing you to grill a wide range of foods. The design of the Junior also allows you cooking versatility. If you want to do more than grilling, you can also steam or smoke with the Junior. To steam, simply close the valve on the flame tray that sits over the burners and fill the tray with liquid. To smoke, add wood chips to the flame tray to add smoking to your cooking.

The Junior is ideal for any location where space is at a premium you don't need a full size grill. The Junior is designed so you can add a variety of accessories, such as a front shelf or a side burner. It is also designed to be easy to use, with push button igniters and straight forward operation.
