Product Description

LS Tractor Rake Grapple MCG7201 - 75"

Take on the biggest jobs with confidence using the LS Tractor MCG7201 75" Rake Grapple—built for serious land clearing, heavy debris handling, and high-volume work. Designed for larger compact and utility tractors, this grapple combines massive capacity with rugged AR400 steel construction to handle demanding conditions day in and day out.

With a wide 75" rake width and nearly 77" overall width, the MCG7201 allows you to cover more ground with every pass—perfect for clearing large properties, construction sites, and storm debris. Its aggressive tooth layout, featuring 12 bottom and 11 top teeth, delivers maximum grip and control, while the open rake design lets dirt fall through so you're only moving what matters.

A large 41" jaw opening, powered by dual hydraulic cylinders with a longer 6" stroke, gives you the ability to grab and secure oversized loads like logs, brush piles, and root systems with ease. Built with thicker outer teeth (12mm) and reinforced inner teeth (10mm), this grapple is engineered for strength where it matters most.

While it offers heavy-duty performance, it's purpose-built for LS MT3, MT4, and MT5 series tractors—making it the ideal upgrade for operators needing more capacity and productivity.

Key Features:

- **Heavy-duty AR400 steel construction** for extreme durability
- **75" rake width / 76 3/4" overall width** for maximum coverage
- **Massive 41" jaw opening** for handling large, bulky loads
- **Dual hydraulic cylinders (6" stroke)** for powerful clamping force
- **12 bottom & 11 top teeth** for superior grip and load control
- **Thicker outer teeth (12mm) + reinforced inner teeth (10mm)** for added strength
- **Open rake design** allows dirt and debris to fall through
- **Universal skid steer quick attach** for fast, easy hookup

Specifications:

- Attach Type: Skid steer quick attach
- Material: AR400 steel
- Weight: 476 lbs
- Overall Width: 76 3/4"
- Rake Width: 75"

- Closed Height: 31 2/3"
- Jaw Opening: 41"
- Side Width: 20 1/5"
- Tooth Thickness:
 - Outer Teeth: 12mm (0.47")
 - Inner Teeth: 10mm (0.39")
- Number of Teeth: 12 Bottom & 11 Top
- Hydraulic Cylinder: 2" x 1-1/5" rod (6" stroke)

Compatible With:

- LS MT3 Series
- LS MT4 Series
- LS MT5 Series

The LS MCG7201 is built for operators who need maximum capacity, strength, and efficiency—making it the ultimate tool for tackling large-scale jobs with ease.
