Product Description

DHE Atlas Heavy Duty 7' Box Blade

Maximum Coverage, Heavy-Duty Strength

When you need to move more material and cover more ground in less time, the **DHE Atlas Heavy Duty 7' Box Blade** is built for the job. Designed for larger compact and utility tractors, this rugged attachment is perfect for driveway maintenance, land leveling, grading, and site prep in demanding conditions.

Constructed with a reinforced, heavy-duty steel frame, the Atlas series is made to handle serious workloads without flexing or wearing down. The wide 7-foot working width allows you to tackle bigger projects efficiently while maintaining smooth, even results.

Equipped with adjustable scarifier shanks, this box blade easily rips through hard-packed soil, gravel, and tough terrain to loosen material before leveling. Dual cutting edges on the front and rear provide excellent control when moving and spreading material, while reversible wear edges help extend the life of the blade and keep it performing at its best.

The standard 3-point hitch makes hookup quick and easy, so you can get right to work.

Key Features:

- Heavy-duty steel construction for long-lasting durability
- 7' working width - ideal for larger compact and utility tractors
- Adjustable scarifiers for breaking up hard ground
- Dual cutting edges for efficient grading and backfilling
- Reversible wear edges for extended service life
- Perfect for driveway work, land leveling, and construction prep
- Standard 3-point hitch for easy attachment

For bigger jobs that require strength, efficiency, and reliability, the **DHE Atlas Heavy Duty 7' Box Blade** is ready to deliver.
