Product Description

DHE GM180-6 Finishing Mower 6'

Rear Discharge, Clean Cut Every Time

The **DHE GM180-6 6' Rear Discharge Finishing Mower** is built to deliver a smooth, professional-quality cut for large lawns, estates, and open areas. Designed for efficiency and precision, this mower is perfect for maintaining fields, parks, and properties where a clean, even finish matters.

With its 6-foot cutting width, the GM180-6 allows you to cover more ground in less time, making it an excellent match for compact and utility tractors. The rear discharge design evenly spreads clippings behind the mower, reducing clumping and leaving a clean, well-manicured appearance.

Built with a durable steel deck and heavy-duty components, this finishing mower is made to handle regular use while maintaining consistent performance. Multiple high-speed blades work together to provide a smooth, even cut across the entire width, while adjustable cutting height settings give you control over your finish.

The floating hitch design helps the mower follow ground contours, ensuring a consistent cut even on uneven terrain. Anti-scalp wheels provide added protection and prevent gouging, helping maintain a clean look across your property.

Key Features:

- 6' cutting width for efficient mowing of larger areas
- Rear discharge for even clipping distribution and clean results
- Heavy-duty steel deck for long-lasting durability
- Multiple high-speed blades for a smooth, even cut
- Adjustable cutting height for customized finish
- Floating hitch for better ground contour following
- Anti-scalp wheels to prevent turf damage
- Standard 3-point hitch for quick and easy hookup

For a reliable mower that delivers a professional finish every time, the **DHE GM180-6 Rear Discharge Finishing Mower** is ready to go to work.
