Product Description

Woods BW12.40 Batwing Cutter

The Woods BW12.40 Batwing Cutter is built for dependable mowing performance on pastures, fields, roadsides, hunting land, and large acreage properties. With a 12-foot cutting width, this cutter helps cover more ground in less time while still giving you the flexibility of a flex-wing design for uneven terrain.

The batwing design allows the cutter to follow ground contours better than a rigid deck, making it a great choice for rolling land, field edges, and general property maintenance. Woods is known for durable, quality-built equipment, and the BW12.40 is a solid option for landowners, farmers, and municipalities needing reliable wide-area mowing capability.

Key Features:

- 12-foot cutting width
- Flex-wing/batwing design
- Great for pastures, fields, roadsides, and large properties
- Helps maintain grass, weeds, and light brush
- Follows uneven terrain better than a rigid cutter
- Durable Woods construction
- Ideal for farm, ranch, commercial, and property maintenance use

A dependable cutter for anyone needing efficient mowing coverage and the durability Woods equipment is known for.
