Product Description

Backwoods BW-LL7 Land Leveler – 7' Angled

The Backwoods BW-LL7 Land Leveler is a practical 7-foot attachment built for smoothing, grading, and maintaining gravel driveways, farm roads, parking areas, dirt lanes, and property access roads. The angled design helps move and level material efficiently, making it a great tool for keeping rough areas cleaned up and easy to travel.

This land leveler is ideal for spreading gravel, filling low spots, cutting down high spots, and maintaining a smooth, even surface. The 3-point hitch design makes hookup simple for compact and utility tractors.

Key Features:

- 7-foot working width
- Angled land leveler design
- 3-point hitch attachment
- Great for gravel driveways, farm roads, lanes, and parking areas
- Helps smooth, grade, spread, and level material
- Useful for filling ruts and maintaining worn areas
- Ideal for property owners, farms, and small acreage maintenance

A solid attachment for anyone needing a simple and dependable way to keep driveways, roads, and work areas smooth and maintained.
