Product Description

Woods MDS8.30 Cutter

The Woods MDS8.30 Cutter is a dependable 8-foot rotary cutter built for mowing pastures, fields, farm lanes, hunting land, and large acreage properties. With its wide cutting width and durable Woods construction, this cutter is a great option for keeping grass, weeds, and light brush under control.

The MDS8.30 is designed for landowners, farmers, and property managers needing more coverage than a standard single-spindle cutter while still being easier to maneuver than a larger batwing mower. It's a solid choice for routine property maintenance, field cleanup, and pasture mowing.

Key Features:

- 8-foot cutting width
- Heavy-duty rotary cutter design
- Great for pastures, fields, food plots, and acreage maintenance
- Helps control grass, weeds, and light brush
- Durable Woods-built construction
- Ideal for farm, ranch, and property maintenance use
- Good option for covering more ground efficiently

A practical and dependable cutter for anyone needing a wider mowing attachment with the quality and durability Woods equipment is known for.
