Product Description

STIHL BF-KM Mini-Cultivator

The **STIHL BF-KM Mini-Cultivator** is a handy KombiSystem attachment designed for loosening soil, refreshing flower beds, and mixing amendments into planting areas. It is a great choice for homeowners, gardeners, and property owners who already use a STIHL KombiMotor and want to get more use from one powerhead.

The BF-KM is ideal for working in tight areas where larger tillers may be too bulky. It helps break up packed soil, re-cultivate garden beds, and prepare areas for planting. STIHL notes that this attachment uses pick-style tines and is built for re-cultivating, loosening soil, and breaking up heavier or loamy soils.

Key Features:

- STIHL KombiSystem mini-cultivator attachment
- Great for flower beds, gardens, and planting areas
- Helps loosen soil and mix in amendments
- Useful for breaking up compacted, heavy, or loamy soil
- Compact design for working in tighter spaces
- Pick-style tines for dependable cultivating performance
- Splash guard helps reduce debris throwback
- Designed for use with compatible STIHL KombiMotors

A practical attachment for anyone wanting to turn their STIHL KombiMotor into a useful soil-working tool for garden prep, flower bed maintenance, and small landscaping projects.
